

CLAIM AMENDMENTS

Claim Amendment Summary

Claims pending

- At time of the Action: Claims 1-14.
- After this Response: Claims 1-14.

Canceled or Withdrawn claims: none.

Amended claims: 1-14.

New claims: none.

Claims:

Sub C
1. (presently amended) A multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising:

a source-selection determiner configured to determine a source selected for a Mopy in a Mopy job, ~~wherein the source for the Mopy may be selected~~ from multiple sources on the MFD

a destination-selection determiner configured to determine a destination selected for a Mopy in a Mopy job ~~wherein the destination for the Mopy may be selected~~ from multiple destinations on the MFD;

a Mopy-job formatter configured to format a Mopy job that includes source-selecting directions for at least one Mopy in the job and destination-selecting directions for at least one Mopy in the job;

1 a Mopy-job transmitter configured to transmit the Mopy job to the a
2 MFD.

3
4 2. (presently amended) A MFD Mopy-enabled multifunction
5 device (MFD) comprising:

6 a printing engine;

7 multiple sources;

8 multiple destinations;

9 a receiver configured to receive a Mopy job from a ~~Mopying control~~
10 ~~system as recited in claim 1~~ multiple-original-output ("Mopying") control
11 system for use with the MFD, the system comprising:

12 a source-selection determiner configured to determine a source
13 selected for a Mopy in a Mopy job from multiple sources on the MFD;

14 a destination-selection determiner configured to determine a
15 destination selected for a Mopy in a Mopy from multiple destinations on
16 the MFD;

17 a Mopy-job formatter configured to format a Mopy job that
18 includes source-selecting directions for at least one Mopy in the job and
19 destination-selecting directions for at least one Mopy in the job;

20 a Mopy-job transmitter configured to transmit the Mopy job to
21 the MFD.

1 3. (presently amended) A printer driver comprising a
2 ~~Mopying control system as recited in claim 1~~ a multiple-original-output
3 ("Mopying") control system for use with the MFD, the system comprising:

4 a source-selection determiner configured to determine a source
5 selected for a Mopy in a Mopy job from multiple sources on the MFD;

6 a destination-selection determiner configured to determine a
7 destination selected for a Mopy in a Mopy from multiple destinations on
8 the MFD;

9 a Mopy-job formatter configured to format a Mopy job that
10 includes source-selecting directions for at least one Mopy in the job and
11 destination-selecting directions for at least one Mopy in the job;

12 a Mopy-job transmitter configured to transmit the Mopy job to
13 the MFD..

14
15 4. (presently amended) An application comprising a ~~Mopying~~
16 ~~control system as recited in claim 1~~ a multiple-original-output ("Mopying")
17 control system for use with the MFD, the system comprising:

18 a source-selection determiner configured to determine a source
19 selected for a Mopy in a Mopy job from multiple sources on the MFD;

20 a destination-selection determiner configured to determine a
21 destination selected for a Mopy in a Mopy from multiple destinations on
22 the MFD;

23 a Mopy-job formatter configured to format a Mopy job that
24 includes source-selecting directions for at least one Mopy in the job and
25 destination-selecting directions for at least one Mopy in the job;

 a Mopy-job transmitter configured to transmit the Mopy job to
the MFD..

1
2 5. (presently amended) An operating system comprising a
3 ~~Mopying control system as recited in claim 1~~ a multiple-original-output
4 ("Mopying") control system for use with the MFD, the system comprising:

5 a source-selection determiner configured to determine a source
6 selected for a Mopy in a Mopy job from multiple sources on the MFD;

7 a destination-selection determiner configured to determine a
8 destination selected for a Mopy in a Mopy from multiple destinations on
9 the MFD;

10 a Mopy-job formatter configured to format a Mopy job that
11 includes source-selecting directions for at least one Mopy in the job and
12 destination-selecting directions for at least one Mopy in the job;

13 a Mopy-job transmitter configured to transmit the Mopy job to
14 the MFD..

15
16 6. (presently amended) A method facilitating multiple-
17 original-output ("Mopying") control of a Mopy-enabled multifunction device
18 (MFD), the method comprising:

19 specifying a source for a Mopy in a Mopy job, ~~wherein the source for~~
20 ~~the Mopy may be one of~~ from multiple sources on the MFD;

21 specifying a destination for a Mopy in a Mopy job ~~wherein the~~
22 ~~destination for the Mopy may be one of~~ from multiple destinations on the
23 MFD.

1 7. (presently amended)

 A method as recited in claim 6,
2 further comprising:

3 formatting a Mopy job, such job includes source-selecting directions for
4 at least one Mopy in the job and destination-selecting directions for at least one
5 Mopy in the job;

6 transmitting the Mopy job to the a MFD.

7
8 8. (presently amended)

 A computer-readable medium having
9 computer-executable instructions that, when executed by a computer, performs
10 ~~the method as recited in claim 6~~ a method comprising:

11 specifying a source for a Mopy in a Mopy job from multiple sources on
12 the MFD;

13 specifying a destination for a Mopy in a Mopy job from multiple
14 destinations on the MFD.

15
16 9. (presently amended)

 A multiple-original-output
17 ("Mopying") control system for use with a Mopy-enabled multifunction device
18 (MFD), the system comprising:

19 a source-selection specifier configured to select a source for each Mopy
20 in a Mopy job, ~~wherein a source for the Mopy may be selected~~ from multiple
21 sources on the MFD;

22 a destination-selection specifier configured to select a destination for
23 each Mopy in a Mopy job, ~~wherein a destination for the Mopy may be selected~~
24 from multiple destinations on the MFD.

1 **10. (presently amended)** A system as recited claim 9, further
2 comprising:

3 a Mopy-job formatter configured to format a Mopy job that includes
4 source-selecting directions for each Mopy in the job and destination-selecting
5 directions for each Mopy in the job;

6 a Mopy-job transmitter configured to transmit the Mopy job to the a
7 MFD.

8
9 **11. (presently amended)** A ~~MFD~~ Mopy-enabled multifunction
10 device comprising:

11 a printing engine;

12 multiple sources;

13 multiple destinations;

14 a receiver configured to receive a Mopy job from a ~~Mopying control~~
15 ~~system as recited in claim 9~~ multiple-original-output ("Mopying") control
16 system for use with a MFD, the system comprising:

17 a source-selection specifier configured to select a source for each Mopy
18 in a Mopy job from multiple sources on the MFD;

19 a destination-selection specifier configured to select a destination for
20 each Mopy in a Mopy job from multiple destinations on the MFD.

1 **12. (presently amended)** A printer driver comprising a
2 ~~Mopying control system as recited in claim 9~~ a multiple-original-output
3 ("Mopying") control system for use with a Mopy-enabled multifunction device
4 (MFD), the system comprising.

5 a source-selection specifier configured to select a source for each Mopy
6 in a Mopy job from multiple sources on the MFD;

7 a destination-selection specifier configured to select a destination for
8 each Mopy in a Mopy job from multiple destinations on the MFD.

9
10
11 **13. (presently amended)** An application comprising a ~~Mopying~~
12 ~~control system as recited in claim 9~~ a multiple-original-output ("Mopying")
13 control system for use with a Mopy-enabled multifunction device (MFD), the
14 system comprising.

15 a source-selection specifier configured to select a source for each Mopy
16 in a Mopy job from multiple sources on the MFD;

17 a destination-selection specifier configured to select a destination for
18 each Mopy in a Mopy job from multiple destinations on the MFD.

CU
14. (presently amended) An operating system comprising a
~~Mopying control system as recited in claim 9~~ a multiple-original-output
("Mopying") control system for use with a Mopy-enabled multifunction device
(MFD), the system comprising.

a source-selection specifier configured to select a source for each Mopy
in a Mopy job from multiple sources on the MFD;

a destination-selection specifier configured to select a destination for
each Mopy in a Mopy job from multiple destinations on the MFD.
